Re.: BidGenius

Mrs. Acharya:

After searching for a perfect estimating program designed for contractors, I created my own in Excel format. My system was simple but changes and alternates were somewhat tricky.

As the number of jobs has increased and we are growing larger, I went on the search again to find user-friendly software that an entry-level assistant could handle. After doing my due diligence, almost all my sources pointed me to one program... BidGenius. BidGenius 'thinks' the way I think... We have tried several other programs for our business and your product is by far the best solution we have found. It's the easiest to use and most powerful 'out of the box' bidding program that we've ever seen. Thanks for creating the end of our estimating difficulties. This program is AMAZING.

It allows us to handle the bid process very smoothly. It generates bids, cost estimates and reports quickly and accurately. We cannot think working without BidGenius .I like the following features and use them on a regular basis:

- Drawing and specification breakdown.
- Sub Contractor's Proposal entry
- Auto Generated ITB(s) and Bid Request
- Fax/ Email Bid Documents with Log
- Final Review of Bid
- Management of Bid Activities
- Bid Calendar
- And many more ...

Over all I am EXTREMELY pleased with the program and HIGHLY recommend it to anyone who wants to do away with the headaches of the bidding process.

Thank you,

Dipesh Kumar (Chief Estimator/ Sr. Engineer)
